The screenshot shows a terminal window titled 'laraeantonia@lara-virtualbox: ~'. The terminal output is as follows:

```
See 'docker run --help'.
laraeantonia@lara-virtualbox:~$ sudo docker run hello-world
[sudo] senha para laraeantonia:
Unable to find image 'hello-world:latest' locally
latest: Pulling from library/hello-world
2db29710123e: Pull complete
Digest: sha256:c77be1d3a47d0caf71a82dd893ee61ce01f32fc758031a6ec4cf1389248bb833
Status: Downloaded newer image for hello-world:latest

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
 1. The Docker client contacted the Docker daemon.
 2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
    (amd64)
 3. The Docker daemon created a new container from that image which runs the
    executable that produces the output you are currently reading.
 4. The Docker daemon streamed that output to the Docker client, which sent it
    to your terminal.
```

The terminal window is part of a desktop environment. The taskbar at the bottom shows icons for a web browser, a file manager, and a terminal. The system clock in the bottom right corner indicates the time is 18:07.
